Environment-friendly Energy System

Sustainable Living Environment

Research Means:

- Bio-inspired engineering
- Carbon capture & conversion
- Wireless transfer
- Battery optimization
- Self-powering
- Energy optimization
- Green & healthy building design

End  
user

Mankind

Exposure  
population

Research Means:

- Source tracing
- Climate modeling
- Process simulation
- Risk assessment
- Health impacts
- Pollution control

Physics | Fluid Mechanics  
Mechanical Engineering  
Photovoltaic Engineering  
Process System Engineering  
Electrical and Computer Engineering  
Electrical and Electronic Engineering

Multidiscipline

Toxicology  
Exposure Science  
Atmospheric Science  
Chemical Engineering  
Environmental Science  
Environmental Engineering  
Building Services Engineering

# Curriculum

## Courses on Domain Knowledge

SEEN 5010	Experiment Design and Analysis
SEEN 5020	Design and Optimization of Energy Systems
SEEN 5030	Battery Sustainability
SEEN 5040	Modeling and Simulation of Complex Energy Systems
SEEN 5060	Greenhouse Gas, Air Pollutant Emissions and Mitigation
SEEN 5090	Physical Chemistry of Advanced Energy Materials
SEEN 5100	Hydrogen Energy and Fuel Cell
SEEN 5110	Global Energy and Environment Policy
SEEN 5120	Lifecycle Energy and Economic Analytics
SEEN 5130	Green Building in Sustainable Development
SEEN 5140	Digitalization and Intelligence of Integrated Building Energy Systems
SEEN 5150	Kinetic Energy Harvesting and Conversion
SEEN 5210	Energy Materials and Systems
SEEN 5310	Bio-inspired Energy Systems
SEEN 5320	Machine Learning in Advanced Energy Systems
SEEN 5330	Electrical Power Systems
SEEN 5360	Inorganic Photovoltaic Materials and Devices

More additional courses will be offered by SEE in the future

## PhD

Full-time	3Y with relevant research master's degree 4Y without a relevant research master's degree
Part-time	6 years
Minimum credit(s)	21
Course Requirements	Credit(s)
University PG Core Courses	2
Hub PG Core Courses	4
PG Seminar Courses (two terms)	0
Teaching Assistant Training	0
Required PG courses	15
Credit Transfer	(≤ 6)

# Research Areas

- High Heat Flux Thermal Management

(for LED, high power electronics, flexible devices, Power Batteries)

- Bio-inspired Systems for Energy and Micro Air Vehicles

- Materials Informatics

- Indoor/Outdoor Anthropogenic-related Air Pollution and its Comprehensive Control Measures

- Emission Characterization and Mitigation for Air Pollutants and GHGs

( Emission inventory, modeling, and co-control of APs & GHGs)  
(Source measurement, tracing, and application of big data and AI)

- High-performance Triboelectric Nanogenerator and Tribophotonics

- Intelligent Low-carbon Buildings

- Advanced Electric Power Conversion

- Smart Batteries Towards a More Sustainable World

- Electric Propulsion and Energy Management Systems

- Carbon Capture and Low-carbon Chemical Processes

- Next-generation Solar Cell Materials and Devices

- Indoor and Outdoor Air and Health

- Solar-thermal Energy Harnessing and Regulation

(for carbon capture, solar-fuel, thermal energy storage, and thermal regulation)

- Advanced Membranes and Porous Materials for Separations

- Soft Materials Innovations for Energy and Sustainability

- Air Quality in the Built Environment

- Triboelectric Nanogenerator Enabled Self-powered System

## Why SEE

- SEE is privileged in sustainability, energy, and environment and striving towards excellence to be the global leader for energy, environment, and sustainability.

- Our cross-disciplinary research achievements underpin the education we offer to our students.

- Our goal is to nurture a new generation of energy professionals who take a cross-disciplinary and holistic view of climate change mitigation and emissions reduction in finding.

# Related Research Facilities

- Materials Characterization and Preparation Facility
- Nanosystem Fabrication Facility
- Bio-inspired Engineering Research Facility
- Sustainable Atmospheric Environment Research Facility
- Brilliant Energy Science and Technology Lab
- Atmospheric Environmental Risk Characterization and Management Lab
